Home

Manage My Practice is a full-service medical practice management consulting firm that focuses on helping solo and small independent physician practices to thrive.

We provide targeted expertise in the medical practice industry to help you start your new practice, add providers or ancillary service lines to your business, or help navigate the financial and regulatory challenges your practice faces. Our focus is delivering on-demand, pay as you go solutions that allow you to keep costs down while reaching your financial and organizational goals. We offer consulting on all aspects of your practice, including **fractional practice management** in a virtual environment to give physicians and other providers access to experienced practice management talent without the expense of a major onsite engagement.

We are experts at the wallet-friendly **new practice start-up** and love to work with spouse teams to help the "managing" spouse learn about healthcare. We specialize in setting up solo and small practices, and have experience in starting cash practices (concierge, membership, and Direct Primary Care), insurance practices and insurance/cash hybrid practices. We can furnish almost everything you need to start your practice, perform a **focused project** for one part of your start-up, or just create a Pro Forma to see if your practice vision is feasible financially. **NOTE: Mary Pat has recently accepted a position managing a large group of solo, independent physicians in Chapel Hill, North Carolina, and can accept very few start-up engagements at this time.**

Struggling to collect from patients with high-deductible health plans? Struggling to collect from patients period? Manage My Practice originated the **Credit Card on File (CCOF)** program for medical and dental practices. If you are looking for a program that will both lower your collection costs and increase your revenue, then you need to learn more about CCOF.

Manage My Practice offers **provider credentialing** and **medical coding and billing audits** for compliance and quality assurance, as well as customized webinar training for HIPAA, OSHA and compliance.

Can't figure out why payers keep denying your services? Manage My Practice can review your billing, find the reasons for the denials and set you on a course for improved revenue and understanding of the payer rules.

Need to add some **Social Media Marketing** savvy to your practice? We have what you need in a form that is convenient and affordable **here.**

The **Manage My Practice Blog** keeps our readers up to date with the latest healthcare news, trends and analysis.
