

Medicare and TRICARE patients:

Protect your access to health care. Demand that Congress fix Medicare!

Call your senators and representative today at (888) 434-6200!

If Congress fails to act by Nov. 30, Medicare and TRICARE payments to doctors will be cut by 25 percent at the end of the year. And seniors and military families will pay the price.

What does this mean to you?

Fewer physicians will be able to accept Medicare and TRICARE insurance, and many seniors and military families will lose access to the care they deserve.

The American Medical Association believes patients should have access to the physician of their choice—and physicians should be able to count on payments that cover the cost of providing care.

Congress needs to fix this problem once and for all. As a Medicare or TRICARE patient, you can urge them to take action.

Call (888) 434-6200 today.

Tell your senators and representative it's time to stop these cuts and protect your access to care. Congress isn't going to act unless you do!
